

# One Blood Test. 10 Answers.

Don't wait for symptoms. Detect cancer early with **SPOT-MAS 10** DNA sequencing technology.

Your Health,  
Upgraded

RM **1,488**\*

~~RM 1,800~~

Inclusive of  
Doctor Consultation  
Fee & Complimentary  
Meals

It can screen for 10 types of cancer:

Breast

Lung

Colorectal

Stomach

Liver

Ovari

Pancreas

Head  
& Neck

Oesophagus

Endometrium

Recommended for:

**1** ADULTS AGED 40 AND ABOVE

- Cancer risk increases with age
- Regular preventive screenings

**2** ADULTS BELOW 40 WITH HIGH RISK

- Close family history of cancer
- Genetic tests indicating high risk

Genetic Predisposition Family History

Important notes:

Not suitable for individuals who are pregnant, undergoing cancer treatment, or who have had a bone marrow transplant or blood transfusion.

**SPOT-MAS** is an early detection tool. False negatives or positives may occur and results should be followed up with further diagnostic testing if required.
